

December 2015

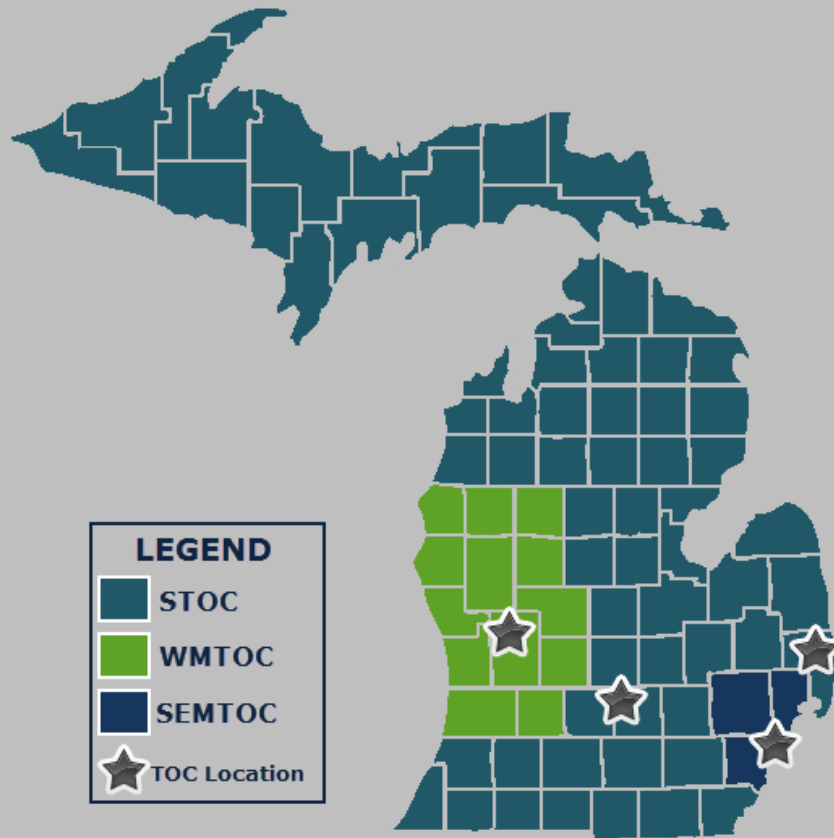

PERFORMANCE MEASURES

Statewide Transportation Operations Center

AECOM

 **MDOT**
Michigan Department of Transportation

The Statewide Transportation Operations Center (STOC) operates 24 hours a day, seven (7) days a week to monitor and manage traffic along the roadway system throughout five (5) MDOT regions. STOC operators utilize closed-circuit television cameras (CCTVs), dynamic message signs (DMS) and various other communication resources in order to receive and disseminate real-time traffic conditions to the motoring public.

Summary of Terminology

Communication – Any phone call, e-mail or radio transmission that comes into or goes out of the control room.

CRO – Control Room Operator

Event – A task in which a CRO is involved. Multiple categories of events exist (e.g., incident, construction, weather, or special event).

FCP – Freeway Courtesy Patrol

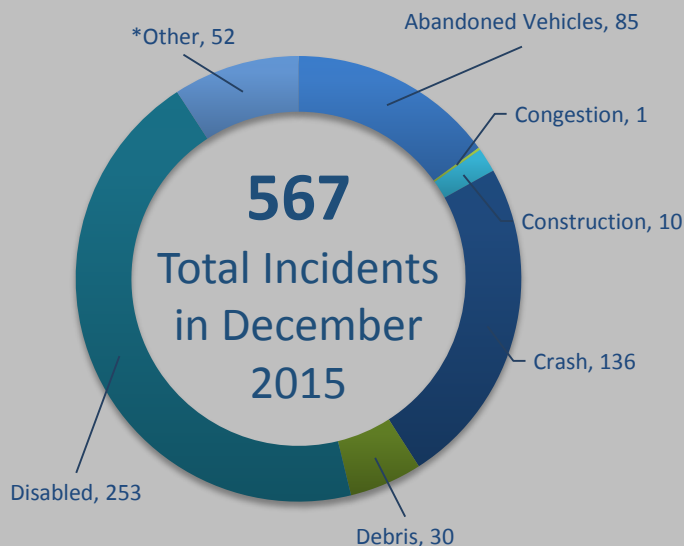

FCP Assist – Service provided to the motoring public for various incidents. Includes tire change, mechanical assist, provide gas, move debris, and traffic policing.

High-Impact Incident – Any incident that closes more than fifty percent of the freeway, closes both directions of an arterial, closes a freeway-to-freeway ramp, or a closure of less than fifty percent of the freeway/roadway but is also causing a significant delay.

Incident – An unplanned event that impacts the shoulder, lane(s) or a ramp of a state of Michigan trunkline (e.g., crash, vehicle fire, debris, or police situation).

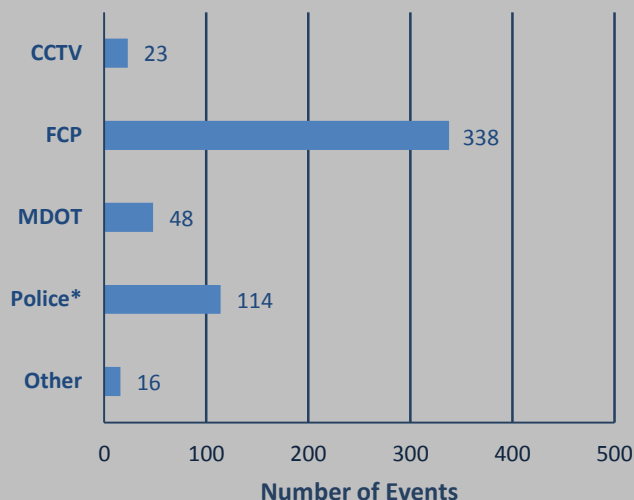

Unique Message – Any message posted to the dynamic messages signs (DMS) that relate to an incident, construction, special event, weather condition or an AMBER alert.

Events by Type

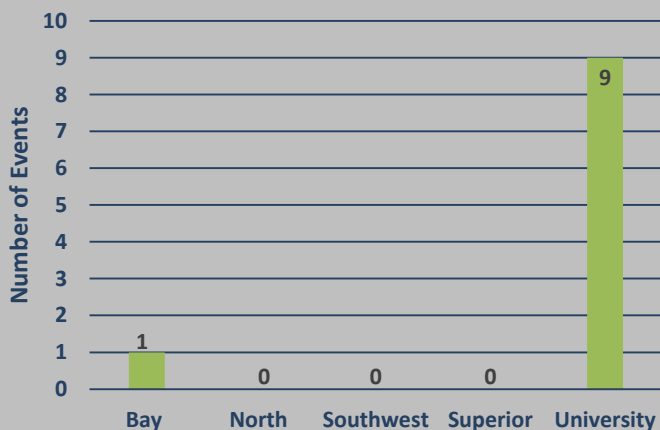

*Other includes police situations, damage to MDOT property, maintenance, weather, AMBER Alerts, fire, special events, and other traffic impediments.

Events by Detection Source

Of the **539** unplanned events in December 2015, **63%** were detected by Freeway Courtesy Patrol. *Includes notification from dispatch, Nixles, and Bay Alerts.

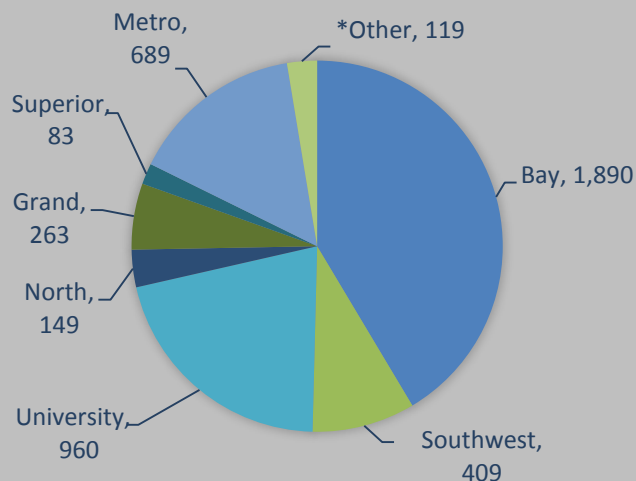

Construction Events

STOC CROs monitored and managed **10** construction events in December 2015.

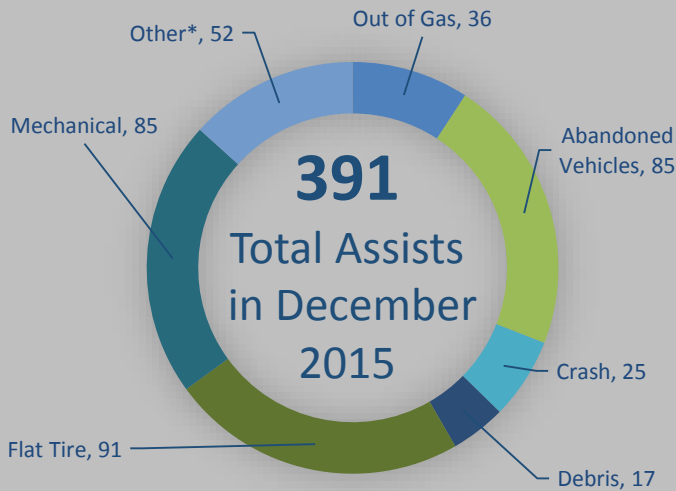

Note: CROs can manage multiple construction events, such as intermittent lane shifts and configuration changes, for each construction project managed by the TSCs.

Communications by Region

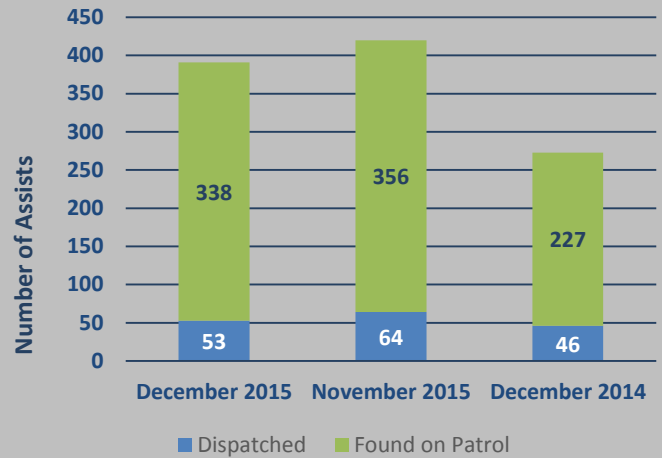

CROs managed **4,562** notifications (phone calls, e-mails, radio transmissions) in December 2015, with the largest percentage of all communications, **41%** (1,890) between the control room and **Bay Region**.

Assists by Type

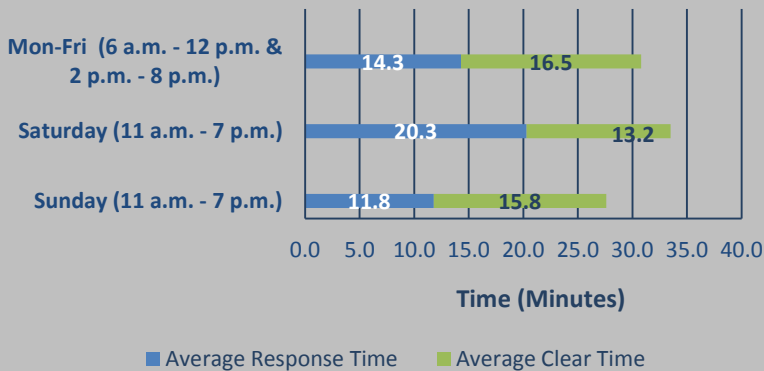

*Other includes motorist sleeping, checking map, using cell phone, or medical emergency.

Dispatched vs. Found on Patrol

Of the 391 assists in December 2015, **86%** (338) were found while FCP drivers patrolled their routes.

Average Assist Times

The response and clear times for all FCP assists are logged by CROs. These numbers represent the average response and clear times for all drivers during the time periods shown.

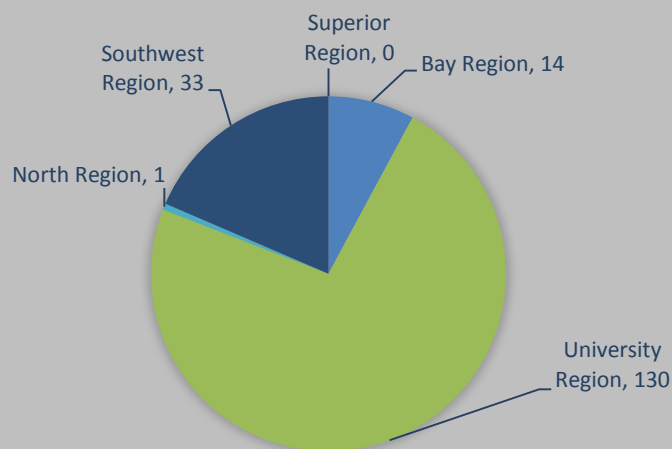

STOC has two FCP drivers working on two routes: one driver working in the Brighton area of I-96 and US-23 and the other driver working in the Ann Arbor area of I-94, US-23 and M-14.

FCP Assists by Freeway

Freeway	Miles Patrolled	Total Assists	Assist Density (assists per mile)	Avg. Response Time (minutes)	Avg. Clear Time (minutes)
US-23	26.5	162	6.1	16.1	18.9
I-94	18	111	6.2	11.8	13.1
I-96	11	67	6.1	16.8	16.3
M-14	15.5	51	3.3	17.3	12.7
Totals/Averages	71	391	5.5	14.5	16.0

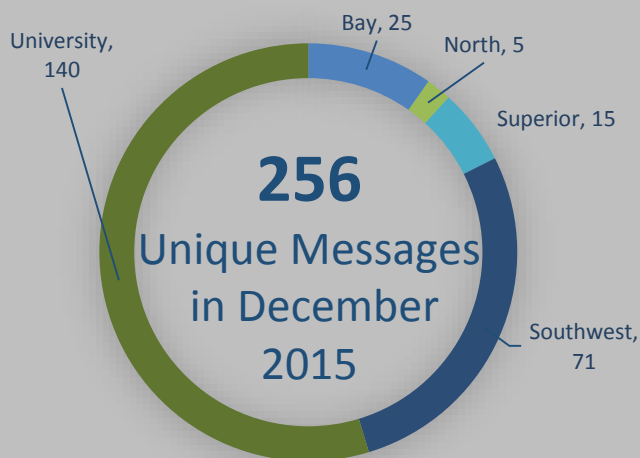

FCP provided the most assistance along **US-23** this month (**162 assists**) and **US-23** experienced the highest assists per mile (**6.1 assists per mile**).

Stuck in Traffic Notifications

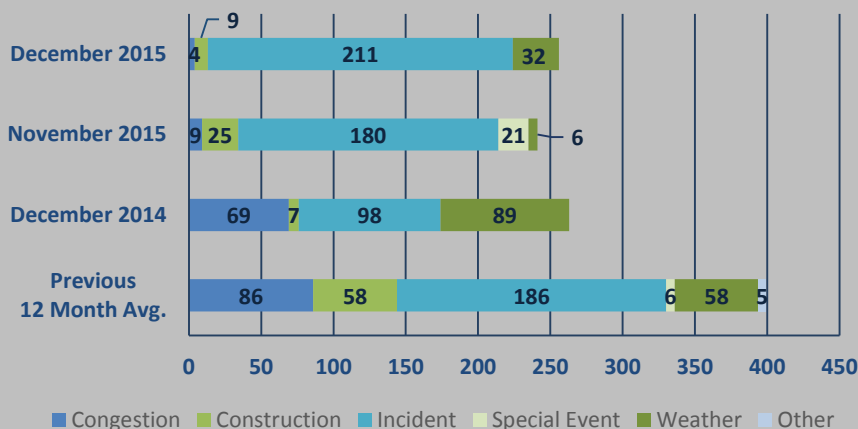

Stuck in traffic notifications are sent to the Control Room via motorists using the Mi Drive mobile website or Mi Drive Application.

DMS Messages by Region

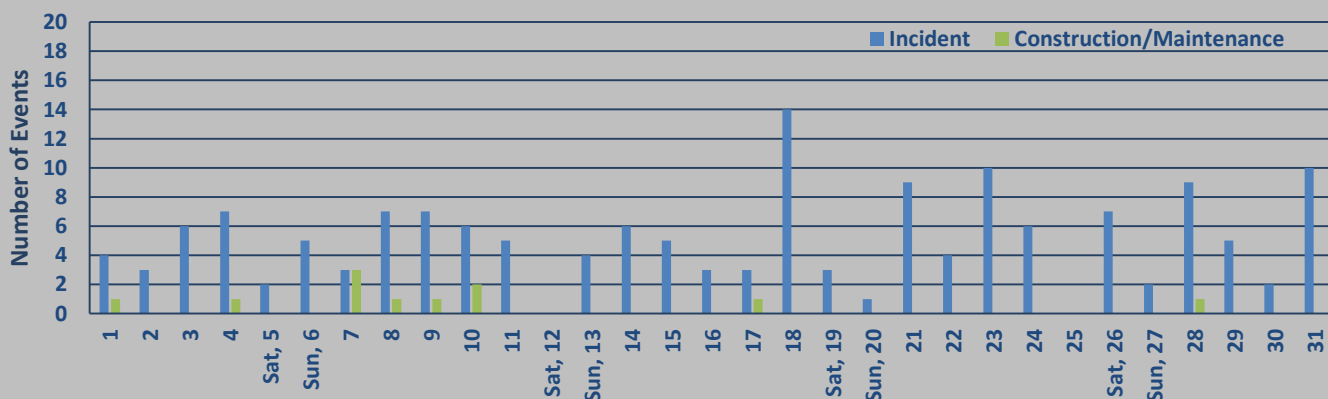

Of the **256** unique messages in December 2015, 55% of them were posted in the **University Region**.

DMS Messages by Type

Once a CRO receives notification and confirmation from stakeholders regarding a specific event, a message specific to the event location and event type will be sent to appropriate dynamic message signs (DMS).

STOC Events Displayed on the Mi Drive Website

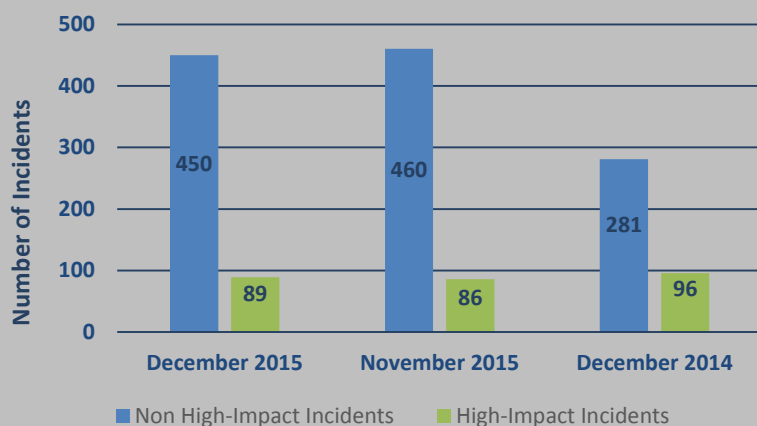

Incidents by Freeway

Freeway	Miles	December 2015			November 2015			December 2014		
		Total Incidents	Incidents per Mile	Average Duration	Total Incidents	Incidents per Mile	Average Duration	Total Incidents	Incidents per Mile	Average Duration
I-475	17	3	0.18	217.30	2	0.12	95.0	1	0.06	1889.0
I-496	12	4	0.33	91.8	4	0.33	30.8	2	0.17	131.5

I-69	178	9	0.05	96.0	3	0.02	279.0	2	0.01	98.5
I-75 *	288	15	0.05	41.5	8	0.03	69.1	8	0.03	79.4
I-94 *	187	143	0.76	26.3	148	0.79	33.5	121	0.65	24.8
I-96 *	76	83	1.09	24.5	67	0.88	24.5	39	0.51	13.8
M-14 *	23	52	2.26	15.8	62	2.70	21.0	41	1.78	19.2
US-127	165	18	0.11	48.7	11	0.07	68.2	17	0.10	66.4
US-131 *	91	1	0.01	25.0	2	0.02	32.5	4	0.04	144.0
US-23	93	167	1.80	22.3	190	2.04	21.7	94	1.01	22.3
US-31 *	85	1	0.01	61.0	0	0.00	0.0	1	0.01	16.0
Total/Averages	1,222	496	0.41	27.8	499	0.41	30.6	333	0.27	35.1

*These figures are discounted and do not include incidents on stretches of freeway managed by WMTOC, SEMTOC or BWBTOC.

Total Incidents

There were a total of **539 Incidents** in the month of December, **17 percent** of these were classified as high-impact.

A high-impact **Incident** is one that closes more than fifty percent of the freeway, closes both directions of an arterial, closes a freeway-to-freeway ramp, or closes less than fifty percent of the freeway/roadway but is also causing a significant delay.

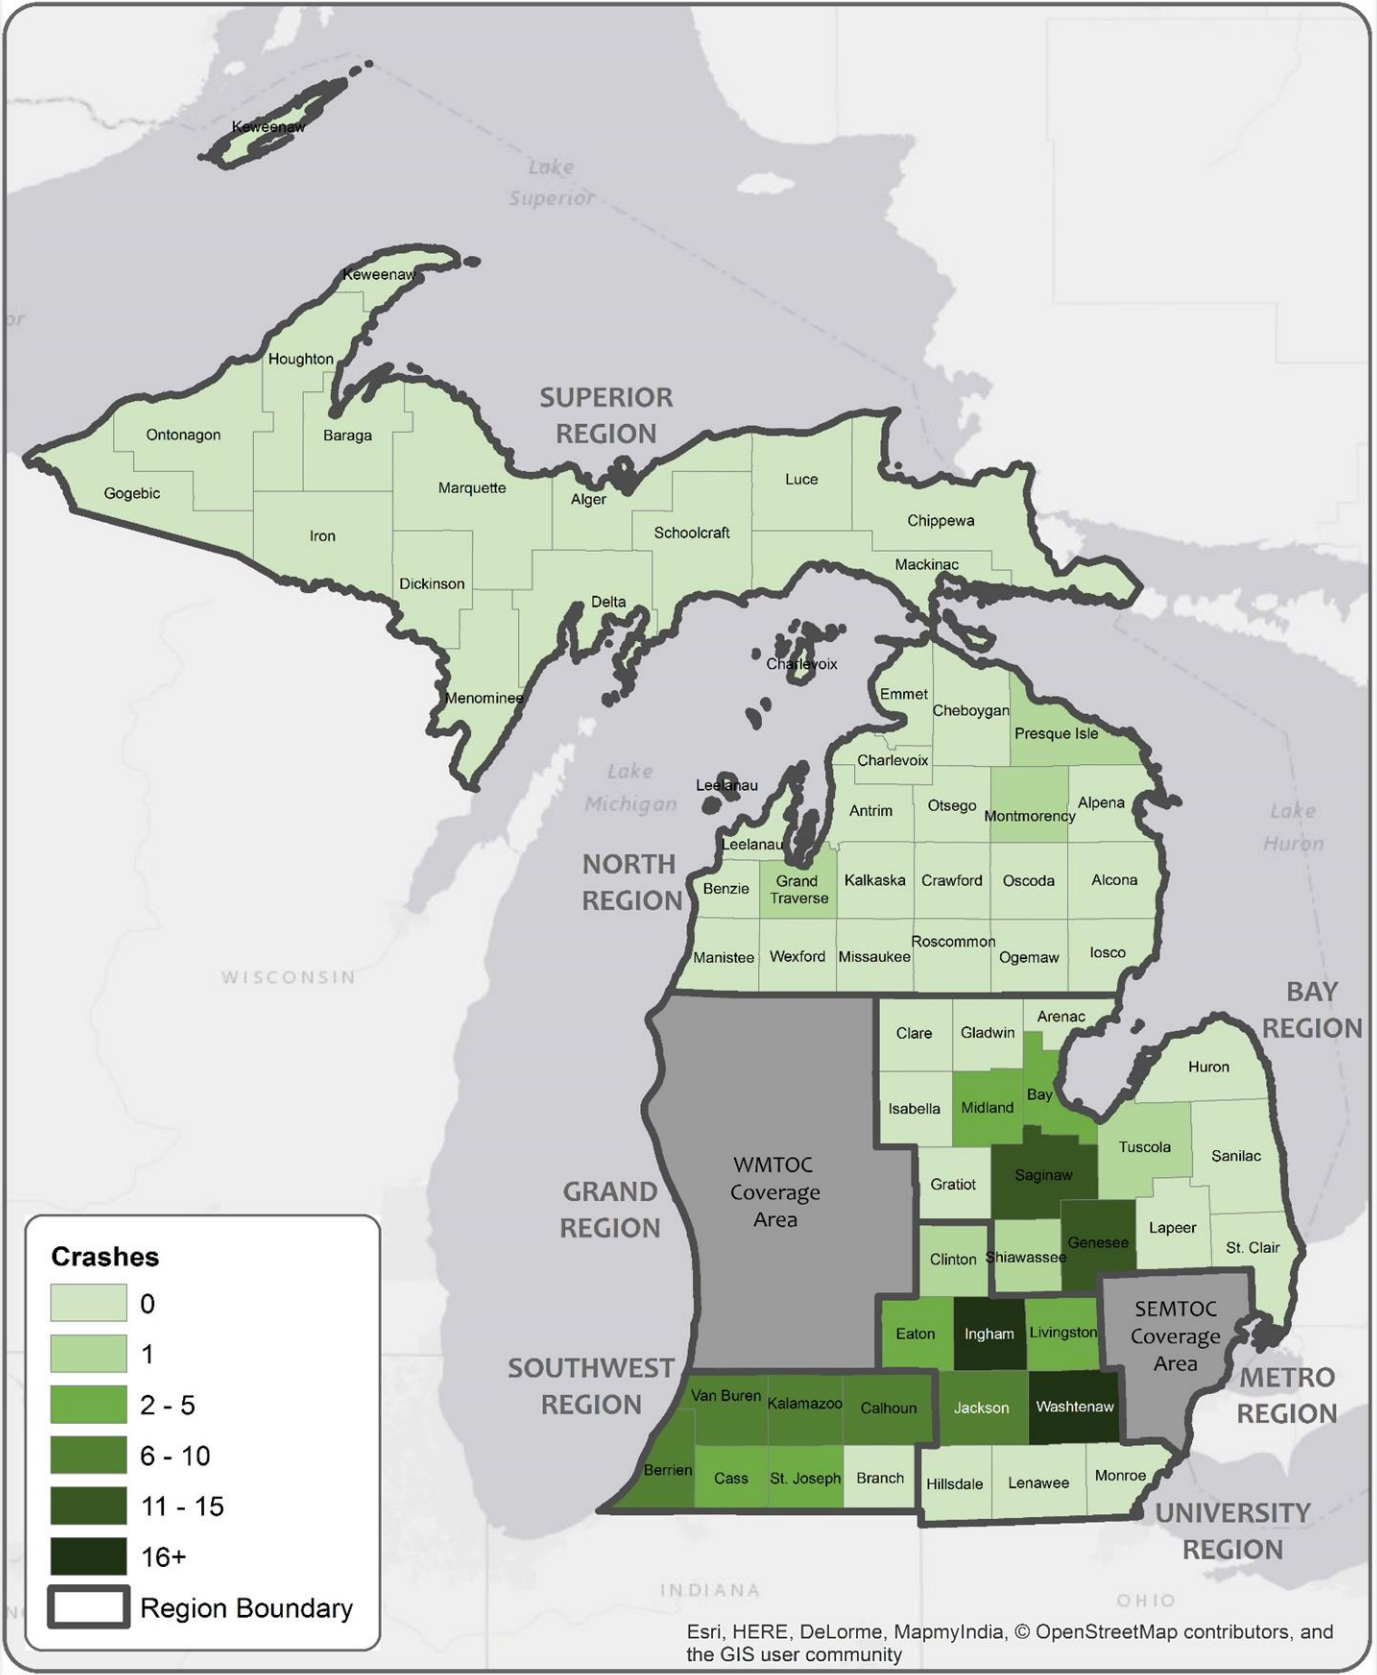

Longest Duration Incidents

Location	County	Day	Duration	Details
SB BL I-96 (Cedar Street) at M-43 (E. Saginaw Street)	Ingham	Tuesday, December 8	937 Minutes	Water Main Break
NB & SB M-54 (N. Dort Highway) at Frances Road	Genesee	Tuesday, December 1	360 Minutes	Structure Fire
EB I-94 Exit ramp to US-12 (Pulaski Highway)	Berrien	Friday, December 18	332 Minutes	Vehicle Crash
WB US-10 BR (Eastman Ave) at Saginaw Road	Midland	Monday, December 7	283 Minutes	Semi Crash
NB & SB M-15 (State Road) at Main Street	Tuscola	Wednesday, December 9	272 Minutes	Structure Fire

The top duration **Incident** this month occurred along **BL I-96 (Cedar St)** and lasted **937 minutes**, compared to the average duration of **34.4 minutes** (average of all STOC managed events).
